Subject: Save yourselves the agony - End it now.

Dear National Energy Board Members,

With reference to the extension of the Enbridge Northern Gateway pipeline proposal.

In a word - Just say NO.

Approving a pipeline to ship bitumen to the West Coast is a ridiculous waste of time.

There will be a continuing moratorium on tankers on the West Coast and if British Columbians are given more say; it will be extended to eliminate those that are already plying their routes in southern waters.

To consider approving a pipeline to the north west coast would be tantamount to approving a pony express license when the post office was already in place.

There is a rapidly declining market for bitumen and there is certainly no appetite for the environmental risks and degradation that this project would inevitably bring by the people of British Columbia.

Sincerely,

Brian Fisher

Subject: regarding letter from Coalition of Hereditary Leaders

Dear National Energy Board Members,

I am Daphne White of Old Massett writing in regards to the letter written to express their request to an extension of the Sunset Clause for the Northern Gateway Project.

*We write to you as a coalition of hereditary leaders residing in Old Massett Haida Gwaii. We are incorporated as the Hereditary Chiefs of North Haida Gwaii LLP, , We wish to apprise you of our position relating to Northern Gateway's submission requesting an extension of the Sunset Clause ("Extension). We support Northern Gateway's requested Extension for the following

The signatories are not all Chiefs. These are Wilson Brown, Robin Brown. Michael Morrison, Arnold Bellis. Neither do they hold any leadership roles in any form. Roy Jones Jr. is not a Old Massett chief or from the North. He is a southern chief of Haida Gwaii. Arnold Bellis site on the Board of Aboriginal Oil/Gas and Mining. He was travelling to many of the Villages that signed onto the project.

The rest of the Chiefs Elvis Davis, Francis Ingram. Carmen Goertzen, Rodney Sheck have signed a "Chiefs Accord" where they have signed to uphold the Haida Laws we abide by. They are accountable to the Council of Haida Nation, to the Nation and their clan membership. Wilson Brown, Elvis Davis, Roy Jones Jr are employees of the Project in question. That would be in their best interests this letter was written.

They did not have permission of Council of Haida Nation nor their clans to write to NEB of our behalf. In our Nation there is no Coalition of Hereditary Leaders. They made that title up themselves.

Please disregard their letter. The Proper letter that NEB should be reviewing is from Council Of Haida Nation.

I am requesting the letter

Sincerely,

Daphne White

Subject: No to Enbridge extension!

Dear National Energy Board Members,
I am writing to oppose any kind of extension clause to be given to Enbridge regarding their
Northers Gateway Pipeline.

The federal government has banned oil tankers from the west coast which makes the pipeline
impossible.

In addition, last fall in Paris, the federal government has committed to limiting global warming by
1.5 degrees. Proceeding with the pipeline would seriously compromise this goal.

Sincerely,

Bibiana Tomasic

Subject: Stop Moving Dirty Oil to Burnaby

Dear National Energy Board Members,

As a resident of Burnaby and a Citizen of Canada I would state my opposition to granting the Enbridge Northern Gateway Project's sunset clause extension request.

I ask you to implement the Trudeau mandate to ban oil tankers into the north coast.

When bitument is spilt it sinks and is impossible to retrieve. Don not ship this stuff by tanker, eventually there will be an accident.

Leave the bitumen in the ground and take a step toward stopping global warming.

Regards,

Sincerely,

Dear National Energy Board Members,
You have heard all the arguments against the proposed Enbridge Northern Gateway project. I don't need to say any more except that I oppose it. The tide is turning, get with it.

Sincerely,

Subject: One More Citizen Opposed.

Dear National Energy Board Members,

I am writing just in the nick of time to CLEARLY state my opposition to granting the Enbridge Northern Gateway Project's sunset clause extension request.

I am also writing to remind you that our federal government committed to implement a north coast oil tanker ban, and they have done this with the support of First Nations, municipalities, scientists, the Province of B.C. and its citizens like me. This commitment, when enacted, will render Enbridge's project impossible.

Has the NEB truly reviewed the National Academy of Sciences study which showed the impact of spilled bitumen? Have you also incorporated into your decision the new 1.5 degree global warming limit instituted by our new government in Paris less than a year ago? I suspect that you have forgotten to include these details in your decision making process.

Looking forward to seeing this situation resolved... thank you in advance for taking this opportunity to set things right.

Sincerely,

Joanna Bowen

Subject: embridge

Dear National Energy Board Members,
I am writing to you because I am very opposed to the granting of the Enbridge Northern Gateway Project sunset clause extension request. We don't want supertankers to load up at our northern coasts. I stand with First Nations to put our land before profit.

Sincerely,

Subject: Request Denied

Dear National Energy Board Members,

As I wrote to you regarding Kinder Morgan so I write today regarding Enbridge's proposed "Northern Gateway Pipeline": I am opposed to this project, I am opposed to any extension request by Enbridge. Your office has all the information necessary to refuse this application for extension.

Subject: "Who killed B.C?"

Dear National Energy Board Members,

I am writing today to state my opposition to granting the Enbridge Northern Gateway Project's sunset clause extension request. first things first I'm sure your already aware that the federal government has to implement a north coast oil tanker ban, now unless you've payed off these politicians to make sure that wont happen, thats gonna put a pretty big thorn in this whole pipeline business. now I live on vancouver Island and I'm sure you know about the juan da fuca plates, and that basically their a ticking time bomb cause when the finally give, im sure all of B.C will feel it, the reason i brought that up is because there is no possible way you could build a pipeline from Alberta to the coast of B.C and make that thing internally earth quake proof, so when the big one does hit, not only are we going to have a devastated province, were also gonna have a even bigger problem from the continues spillage happening in the interior. lets stop focusing on money and start looking at the future, and I know I know, your saying, well in the future when this goes through i will have a shit load of money, okay look further than that, your pipeline fails, and your are sued by multiple people and establishments, now lets look even further into the future than that, a young boy walks with his son through 20 miles of polluted earth where nothing can be built, nothing can grow, and the boy asks his father "Who killed the Forrest daddy?" and the father than tells the tale of the worst man made environmental disaster in history. you will go down in history as villians, as people who cared about nothing more than making a buck, which is the the purpose of human life, we are born to preserve, not destroy.

Sincerely,

Josh Mather
