NEB/ONE

I am an old man nearing the end of my life. I am 73. But I can see the future and the future is for my grand children in this wonderful country. We need clean energy, not reliance on fossel energy. We need the oceans to be safe from even furter pollution. We need a protection that is lasting from the risks of further oil spills. We need to omit all doubt regarding the legal status of the moratorium. Fishing, tourism, agriculture and life depend on a clean safe environment free from toxic spills. I say NO to the extension request that Enbridge Pipeline is asking for. I say no to Northern Gateway's request for an extension. This is unacceptable to the future of our planet. We need a legalized ban which ensures we have lasting protection from the risks of oil tanker spills and oil spills.
