Dear Mr. Sihota:

**Enbridge Pipelines Inc. (Enbridge) – Application for the Deactivation of Keyera
Rimbey Connection at Edmonton Terminal (Project) under section 44 of the
National Energy Board Onshore Pipeline Regulations (OPR)**

The National Energy Board (Board) has considered Enbridge's application, dated
13 January 2017.

The Board has issued Order MO-009-2017 (Order) pursuant to section 44 of the OPR, approving
the Project. A copy of the Order and its Schedule A, which together outline the specifics of the
Project as approved, is attached.

The Board reminds Enbridge that the deactivated pipeline remains subject to Board jurisdiction
and direction, and accordingly Enbridge must maintain the deactivated pipeline and associated
records in compliance with clause 10.15.1.2 of CSA Z662-15.

The Board further reminds Enbridge that under section 45 of the OPR, no pipeline or part of one
that has been deactivated for 12 months or more may be returned to service without leave of the
Board.

The Board directs Enbridge to serve a copy of this letter, the attached Order and its Schedule A
on all interested parties.

Yours truly,

Original signed by

Sheri Young
Secretary of the Board
