13 February 2017

To: Interested Persons

**Board Proceeding RH-001-2017
Enbridge Pipelines Inc. (Enbridge) Application for Review and Variance of the
National Energy Board's (Board) Letter Decision dated 29 October 2015
Suncor Energy Marketing Inc. Letter of Comment regarding Enbridge Toll
Principles Respecting the Line 3 Replacement Program (Toll Principles)
Ruling No. 1 - Participation**

On 27 January 2017, the National Energy Board (Board) issued a letter granting Enbridge a review of the Board's 29 October 2015 Letter Decision regarding the application of the Toll Principles. The letter also set out key steps in the review process in a Timetable of Events. Those persons who were interested in participating in this process were directed to apply to the Board. To apply, applicants were required to submit a letter to the Board briefly explaining their interest in the review of the Letter Decision by 3 February 2017.

The Board received applications from one interested party, Suncor Energy Marketing Inc. (Suncor). In this letter, the Board is issuing its ruling on participation in this proceeding as well as a list of participants. The Board is of the view that Suncor would be sufficiently impacted by the Board's decision, and that its participation would assist the Board in reaching its decisions in this proceeding. Consequently, the Board has decided to grant participation as an intervenor to Suncor.

As an intervenor, Suncor may participate in each process step in the Timetable of Events that is applicable to intervenors, including serving information requests on Enbridge and filing evidence and final argument.

Questions about this process may be addressed to Marian Yuzda, Counsel, toll free at 1-800-899-1265.

Yours truly,

Original signed by

Sheri Young
Secretary of the Board
